

SME PAISA – Platform Documentation

USER ENTRY (NO LOGIN/SIGNUP)

Goal: Capture lead, validate via OTP, auto-create case, assign to Admin for follow-up.

Flow:

1. **Landing Page** – Simple branded UI → “Apply for Loan”
2. Leads to **Form/Bot interaction**
3. **Form Fields:**
4. Name
5. Funding Amount Needed
6. Business Vintage (Years in Business)
7. Phone Number → OTP Verification (mandatory)
8. Type of Business (Proprietorship, Pvt Ltd, etc.)
9. Loan Type Info (Fund/Non-Fund Based, Secured/Unsecured/Hybrid, Limit/Term/Project)
10. **OTP Verification** – If successful:
11. Save as lead
12. Auto-register client (no password/account)
13. Auto-create **Case ID**
14. **Case Creation** – New Case pushed to **Admin Portal**

ADMIN FLOW

Goal: Full control over system operations.

Features:

- View all cases (Incoming → Closed)
- Assign coordinator manually
- View full chat log of any case
- Approve/edit final agreements
- Override associate commission
- View associate details & performance
- Access full audit trail of system activity

COORDINATOR FLOW

Goal: Manage client relationship end-to-end.

Flow:

1. Receives assigned case
 2. Initiates **WhatsApp chat** with client
 3. Portal ↔ WhatsApp API sync
 4. Chat logs stored in portal
 5. Read/delivered status visible
 6. Collects documents via WhatsApp/manual upload (PAN, Aadhaar, Bank Statements, etc.)
 7. Creates **Agreement Draft** (pre-filled template)
 8. Sends to Admin for approval
 9. After approval → sends **eSign link** via WhatsApp
 10. Agreement signed → stored in Case Docs → moves to Offline Processing
-

ASSOCIATE FLOW

Goal: External lead generators with limited portal rights.

Registration:

- PAN, Aadhaar, Bank Proof, Photo upload
- OTP verification + eKYC
- Agreement auto-generated → eSigned
- Post-verification → account activated

Portal Features:

- View only their referred cases
 - Clients linked via referral ID
 - Upload docs on behalf of client
 - No WhatsApp access
 - Commission visible (editable by Admin)
-

AGREEMENT FLOW (E-Sign)

1. Coordinator creates draft agreement
 2. Admin reviews/edits/approves
 3. Approved agreement sent via WhatsApp link
 4. Client signs digitally → stored in Case Docs
 5. Case stage updated → Agreement Signed
-

WHATSAPP INTEGRATION FLOW

- Client communicates only via WhatsApp

- Coordinators manage chat from portal
- Admin has full view of chat history
- Permanent logs for compliance

CASE PIPELINE

Stage	Description
 New Case	Submitted via form, not assigned
 Assigned	Admin assigned to Coordinator
 Docs Pending	Document collection phase
 Agreement Created	Agreement drafted & sent
 Agreement Signed	Client completed eSign
 Offline Processing	Post-agreement stage
 Closed	Loan completed/disbursed

SYSTEM NOTES

- OTP-based client identification (no signup)
 - Admin has full visibility & override
 - Coordinators handle client relationship
 - Associates act as external partners
 - WhatsApp is the only client communication channel
 - Cases track **source** (Direct Form / Associate)
-

DEVELOPMENT ROADMAP

Week 1: Foundation + Form/Bot + Case Creation

- Frontend Form UI (React)
- OTP system (Twilio/Gupshup)
- Case creation (MongoDB)
- Admin panel: view unassigned cases
- Basic Admin login (hardcoded creds)
- Referral logic for associates

Deadline: Day 7

Week 2: Admin + Coordinator Dashboards

- Role-based dashboards (JWT auth)
- Admin: assign cases
- Coordinator: view assigned cases
- Case status tracker
- Case details view

Deadline: Day 13

Week 3: WhatsApp Integration + Chat UI

- WhatsApp API (Twilio/Gupshup)
- Chat UI for coordinators
- Send/receive synced messages
- Store chat in MongoDB by Case ID
- Admin full chat view

Deadline: Day 20

Week 4: Agreement + eSign + Docs Flow

- Agreement template system
- Coordinator: draft agreement
- Admin: approve/edit
- eSign integration (ZoopSign/Digio)
- WhatsApp send link
- Case updated after signature

Deadline: Day 27

Week 5: Associate Flow + Final QA + Deployment

- Associate onboarding (eKYC + eSign)
- Referral ID case linking
- Associate dashboard
- Commission logic per case
- QA testing across modules
- Hosting (Vercel + MongoDB Atlas + Backend Render/VPS)

Deadline: Day 35

POST-MVP ENHANCEMENTS

- Lead recycling
- SLA timers
- Coordinator analytics

- Associate payout module
- OCR auto-doc processing

SME PAISA PRODUCT SUITE

Classified into categories for client pitch/training: - **Working Capital Products** (Limits, Term Loans, Receivables Finance) - **Capex & Project Funding** (Plant/Machinery, Tech upgrade, Green finance) - **Trade & Supply Chain Finance** (Dealer, Vendor, PO, Import/Export) - **Takeover/Restructuring** (Limit enhancement, Debt consolidation) - **Specialty Products** (Women entrepreneurs, NPAs, Startups) - **Govt Schemes** (CGTMSE, PMEGP, Stand-up India)

FUNDING ASSESSMENT FORMULAE

1. Drawing Power = $(\text{Stock} \times \text{Margin}\%) + (\text{Debtors} \times \text{Margin}\%) - \text{Creditors}$
2. Net Working Capital = Current Assets – Current Liabilities
3. Working Capital Gap = WC Requirement – NWC
4. FOIR = $(\text{Total EMI} \div \text{Net Monthly Income}) \times 100$
5. DSCR = Net Operating Income ÷ Total EMI
6. WC Eligibility = Turnover × Prescribed %
7. EMI = $[P \times R \times (1+R)^N] \div [(1+R)^N - 1]$
8. GST Eligibility = Avg GST Sales × 15–20%
9. Banking Surplus = Avg Monthly Credits × 12 × 20–25%
10. Invoice Discounting = Invoice × 80–90%
11. LTV = Asset Value × 50–75%
12. Promoter Contribution % = Capital ÷ Project Cost × 100
13. Inventory Turnover = COGS ÷ Avg Inventory
14. Receivable Days = $(\text{Debtors} \div \text{Sales}) \times 365$

TEAM ROLES

- **Frontend:** React, Tailwind, Axios
- **Backend:** Node.js (Express/NestJS), JWT Auth
- **Database:** MongoDB Atlas (Mongoose)
- **OTP/WhatsApp:** Twilio / Gupshup
- **eSign:** ZoopSign / Digio (sandbox)

FINAL LAUNCH DEADLINE: Day 35 (Week 5, Sunday)
